

TECHNICAL WRITING

Zohreh Dubois - Levels B2-C1

Objectives

- *Writing a well-developed, accurate report on a technical subject
- * Mind-mapping, thesis statement, outline, introduction, content, conclusion and referencing.
- *Acquiring formal style in writing
- *Using graphs, tables, charts and diagrams

Course Content

This course is divided into 4 main activities:

- 1) Research
- 2) Brainstorming
- 3) Student-led sessions
- 4) Collaborative work on the reports

-Research on different technical subjects followed by brainstorming:
Students brainstorm topics on technology or other scientific fields after having done some research work.
This will help them finalize their choices of subject.

-Pairwork:
Students choose their partners with whom they work in pairs throughout the course.

-Student-led sessions:
Students lead the class in pairs, presenting and creating activities around the subject of their report.

-Collaborative work:
Students exchange their 1st draft of report and evaluate each other with a list of criteria

Final Grade

Class participation and presence	50%
Final Reports	50%
