The Art of Multimedia
Levels B1 - C2
Lecturer – James Cox

Class description

You will work on a multimedia project based on the one or more of the arts: painting, drawing, sculpture, photography, architecture, conceptual art, literature, poetry, music, theatre, dance, film, video games, gastronomy etc. In pairs or groups of three, you will be free to choose your subject and present it using appropriate media: video, website, blog, poster, exhibition etc. or a combination of these. The projects will be marked on their originality, content, quality of English and their capacity to inform and entertain other students. The idea is to get as far away as we can from a traditional power point presentation.

Evaluation: 70% project 30% participation
