

Writing Workshop (Levels B2, C1 and C2)

Thomas Harcharick

A **practical** course for upper intermediate and advanced students, designed to help you write clearly and effectively in English with minimal errors. Each week students will produce **in class** a short piece of original writing (short essay, summary, description, resume, cover letter, etc), which will be collected and returned with corrections at the following session.

The first part of each week's session will be devoted to reviewing the most common grammatical and stylistic difficulties encountered, with exercises to help you master written English.

Students will be asked to provide input regarding essay subjects and types of writing which they feel would be most beneficial to their specific needs.

Autonomy Work

Students will choose an individual writing project to be submitted before the end of term after receiving pre-approval.

Assessment will be based on students' progress and active participation.
